GE*1*0001. (group control #)
IEA*1*000000001. (interchange control #)

- During certification, please send a test ASN similar to this example
- If the Home Depot cost is not available, please do not map the SLN segment
- INCLUDE a “Ship From” loop (SF) after the “Ordered By” loop (OB) if the order will be shipped from multiple warehouses.
*The SF loop should include the address of the warehouse that the order shipped from.
- If the order ships UPS, RPS or Vendor Truck, please do not map the REF segment with the “CN” qualifier. The REF*CN Segment with the CN qualifier MUST be mapped for all other carriers.
- Review The Home Depot’s EDI ASN Specifications or call your EDI contact for further clarification
